

Transmission system for evacuation of power from REZ in Rajasthan (20 GW) under Phase-III Part I

The scheme involves HVDC Terminals, HVDC Line, HVAC Transmission Line & Substations, and Communication Sections.

In order to ensure clarity and avoid ambiguity during the clarification process, Bidders interested to participate in the bidding process may kindly adhere the following process during submission of queries:

1. Queries related to HVDC Terminals, HVDC Line, HVAC Transmission Line & Substations and Communication System should be presented in separate sections. This will help in organizing the information and providing a clear understanding to the bidders regarding each specific element.
2. Group all queries pertaining to a particular clause together in the same place.
3. Mark each query with a clause number. The format (**Annexure-19**) of the RFP document may be strictly followed during submission of any query.
4. Queries submitted without adhering to the above directives shall not be answered.
